Factory Destocking **p.2**

## SONOSAX present on next exhibitions

SONOSAX will be present at the booths of our distributors during the next InterBEE in Tokyo and SATIS in Paris.

Feel free to visit us;

Mr Jacques Sax will be present on stand of **TECH TRUST Japan Co** from November 19 to 21 InterBEE, Hall 1/ 1201

Mr Pierre Blanc will be on stand of **AREITEC** from November 18 to 20 during the SATIS, stand E07.

**TECH TRUST JAPAN Co Ltd**  
appointed as new **SONOSAX** distributor in Japan

During the past 6 years SONOSAX was represented in Japan by DSP Japan Ltd with whom we have had - and still have - excellent and friendly relations. Considering DSP's business orientations and main activities, it was agreed by both parties that the situation was not ideal; therefore decision has been made to cease our collaboration. In this newsletter we would like to personally thank Mr. Yanase Satoshi for his continued support over the years and wish him and his colleagues all the best for the future.

Obviously SONOSAX will never neglect its loyal Japanese customers, so we are pleased to announce that the exclusive distribution of SONOSAX products in Japan, which became effective by November 1st, was given to the company TECH TRUST Japan Co Ltd.

Based in Tokyo, TECH TRUST Japan Co Ltd is a leading distribution company, service oriented and well positioned in the markets of the so called "On Location" recording equipments as well as broadcasting studios and facilities.

Although it is a young company; all TECH TRUST collaborators have a solid experience in the fields of professional audio and have excellent knowledge's of SONOSAX products. We are therefore confident that TECH TRUST will offer a perfect support to SONOSAX users in Japan.

We wish a warm welcome to everyone at TECH TRUST in our small SONOSAX family, and we are looking forward for a trustful partnership.

## SONOSAX SX-R4+ and SONOSAX SX-AD8+ soon unveiled

Although these new equipments were announced for the end of 2014, they will not be available before April 2015. Innovative ideas having occurred during the year, their development have been somewhat delayed.

Develop products of the highest quality using advanced technology and respond closer to the user's needs is a challenge SONOSAX has successfully met many times in the past; releasing these equipments on the market within the expected deadline is by far not always obvious

Despite these delays, we are pleased to announce that the new recorder **SONOSAX SX-R4+** and the 8 channels preamp **SONOSAX SX-AD8+** will be officially unveiled at Tokyo's InterBEE and during the SATIS in Paris. For those who could not attend these fairs we publish above a picture of the forthcoming **SX-R4+**

Unable to respond individually to all the requests we receive daily regarding our new products, we will post detailed informations in the December issue of our **SONONEWS**
