

**SONOSAX will no longer attend large exhibitions but will focus on local events.**

During the past years, the numbers of visitors to major exhibitions have been steadily declining, while the cost for exhibitors still growing, and therefore we have decided to no longer participate to large exhibitions.

However, although all information's regarding our products are available on our website, we consider that maintaining direct contact with the professionals of the branch is very important. Therefore we will focus on local seminars with our distributors, and we will continue supporting our distributors participating to local shows.

## SONOSAX SX-M32

### Now with Optical TOS-LINK adapter

With the growing popularity of the SONOSAX SX-M32 mixer a new demand has raised to digitally connect the SX-M32 onto simple – low cost – recorder or directly to a computer having an optical input. A new option have then be developed, consisting in a TOS Link interface mounted on a mechanical adapter that fits in the "OPTION" enclosure of the SX-M32. This new option can be retrofitted on any existing SX-M32 providing that no other option have been installed.

Note however that most devices offering an optical input are limited to 16bit, thus to ensure a full compatibility with the receiver, it is advised to set the Analog to Digital converter to 16 bit by means of its internal soldering jumper.

### SX-M32 improved performances of the Limiters

On the latest series of SX-M32 mixer (serial nr 100 and above) the circuitries of the Limiters have been slightly redesigned to improve their sonic performances. All existing SX-M32 mixer with serial nr below 100 can be modified to take benefit if this improvement for a cost of CHF 150.00 (aprox Eur 100) that covers material and labor. This modification can be done by your local distributor to avoid additional shipping costs to factory.

Another improvement has been carried on the reference oscillator to avoid possible drift of the reference level. This change may be made at the same time as the modification of the limiters at no additional cost.

### STUDITECH – Moscow appointed as new SONOSAX distributor in Russia

SONOSAX is proud to announce the appointment of the company STUDITEC in Moscow to represent SONOSAX products in Russia.

STUDITECH started in 1992 and has a solid experience and excellent technical knowledge's in professional audio. For any further information please visit their website at: [www.studitech.ru](http://www.studitech.ru)
