SONOSAX SX62R

An Offroad Mixer/Recorder

Announced a couples of years ago the development of the SONOSAX SX62R was put on hold while completing the development of the SX-M32, SX-R4 and of the latest SX-ES64 mixer.

SONOSAX is proud to announce that the development of the SONOSAX SX62R is now well advanced and that its release is foreseen for late summer 2010.

The SONOSAX SX62R is a Compact and Light Weight High Quality 6 channels Mixer with a true Stereo bus with a fully integrated 8 Tracks Recorder on SSD Drive and CF Card.

Ideal companion for Field Productions - Documentaries - Feature Film - Music Recording-etc the SONOSAX SX62R is designed as an "Offroad" Mixer/Recorder to be used in any environment.

It will take benefit of a new ergonomic concept, all standard functionalities are directly accessible and all configurations are done trough an intuitive menu accessible simply by touching the large colour screen.

All connections are located on the back, in a recessed panel, thus protecting the connectors and the cables.

The SONOSAX SX62R will provide with most of the features found in larger mixer such as the SX-ES64 or the SONOSAX SX-ST.

More detailed information's will be posted on our website in a few weeks.
