

## In this issue:

- RTS acquires the SONOSAX SX62R **P.1**
- Exchange rates and Leasing **P.1**
- SONOSAX SX-84 available **P.2**
- Firmware version 4.1 for SX-ST with a new remote controller **P.2**

### RTS RADIO TELEVISION SUISSE acquiers **SONOSAX SX62R**

From February 2012, the Swiss Televisions will broadcast all programs in HD; to meet its new challenges and to cover the evolution of their future needs in terms of production, RTS Radio Television Suisse (french speaking television) conducted a harsh assessment of three competing products and ultimately referred her choice on the new SONOSAX SX62R; 16 units have been delivered to RTS by early September.

Giovanni Del Gaudio – head of "On Location Sound" dept- and his close collaborator Matilda Angullo explain the choice of SONOSAX SX62R:

*"We wanted a true 6-channel analog mixer that can cover all shooting conditions. The versatility of SX62R makes it a perfect tool because you can configure it quickly regardless of the production's requirements; be it a simple sound recording, sending a final "dialogue" mix to the camera while recording ambient sounds in M/S on the CF card, for multi-camera productions or recording music on multitrack for example. The many possible configurations of the mixer, pre/post fader assignments and the routing matrix on the recorder offer to sound engineer's a great flexibility in their works; recording a final mix on the camera while saving a back up mix on the recorder, being able to supply all iso tracks for post-production purposes are a real security for the producers.*

*The audio files of SX62R offer an extensive implementation of metadata, they proved to be*

*perfectly compatible with our audio and video editing systems..*

*Sound quality was also an important criterion in selecting the products we tested; the sonic performances of the SONOSAX SX62R are irreproachable, as for the SONOSAX SX42 mixer that we are using extensively for over 7 years. SONOSAX product reliability also counted when choosing of SX62R"*

**EUR - CHF - USD**

The strength of the Swiss franc is abnormally high and currency speculation leads to instability in exchange rates.

If you wish to purchase a SONOSAX product, feel free to contact us directly, we will give you a firm offer in Euro or Dollars with short term.

### LEASING

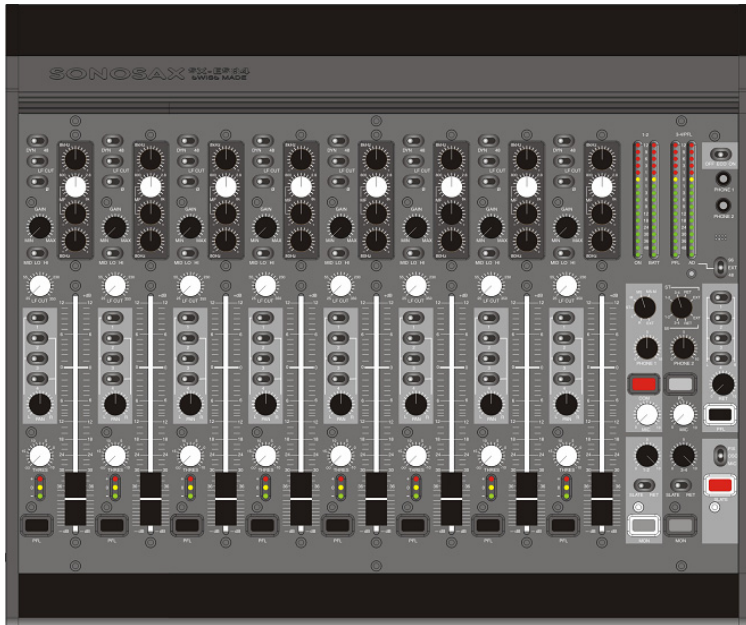

SONOSAX SAS SA can offer you to acquire its products in leasing, do not hesitate to contact us for an offer and we will examine a leasing proposal, depending on your country of residence.

# SONOSAX

**SONOSAX SX-ES84** available now

Announced in late March, the first deliveries of the SX-ES84 have taken place by early August already. This new mixer is identical to the SX-ES64 but simply has two additional input channels.

Channel's direct outputs (configurable pre/post fader), 4 mixing busses assignable pre/post fader and two independent monitoring sections with private line for communication are part of the basic system.

The semi-parametric 3 bands equalizers and the digital outputs are available as options.

## SONOSAX SX-ST internal recorder firmware 4.1 and new remote controller

The Firmware version 4.1 for the SX-R4 is a direct result of the development of the SX62R. The version 4.1 will soon be available also for the integrated recorder of the SONOSAX SX-ST; however, the update is only possible with the new remote control which is currently being manufactured.

Based on a color touch screen identical to that of the SX62R, this new remote controller offers a very friendly user interface and allows direct access to configuration settings and easy editing of metadata pre or post recording.
