In this issue:

- What's new for 2012 **P.1**
- Post your used Sonosax equipment **P.1**
- Recorder of the SX-ST **P.2**
- Version 4.2 and new remote control report by François Musy

THE WHOLE **SONOSAX** TEAM PRESENTS YOU ITS BEST WISHES FOR 2012

Year 2012 looks rich in events and in novelties for SONOSAX, we take advantage at this beginning of year to announce you some of our main projects:

The major event will be the moving of the SONOSAX Company; two buildings are currently under construction in the South of Lausanne, a few steps away from the banks of the Lake Geneva. This real estate project will comprises not only the new premises of the company SONOSAX and some additional offices to rent, but also the apartment hotel of about thirty rooms / studios.

The moving is planned for the end of this year already.

SECOND HAND FOR SALE ... POST YOUR AD ON OUR WEBSITE

SONOSAX is offering a new service to Sonosax users who wish to sale their used equipments. This free service is offered exclusively for SONOSAX equipments.

Any sale is done directly from user to user, the company Sonosax is not involved in the transactions.

To post your ad, simply send us by e-mail all necessary information such as:

- the model of the unit and possibly the serial nr, its configuration and the options installed, the date of first commissioning; a good quality picture.
- Your name, your e-mail address and phone number.
- Your expected price and currency

SONOSAX SX-ST RECORDER

FIRMWARE VERSION 4.2 WITH NEW TOUCH SCREEN REMOTE CONTROL

The Firmware version 4.2 for the integrated recorder of the SONOSAX SX-ST is now available.

As for all SONOSAX recorders the firmware is available for free download on our website, however carefully note that up-grading to version 4.2 requires the new touch screen remote control, please check with you local distributor for pricing.

Based on a color touch screen identical to that of the SX62R, this new remote controller offers a very friendly user interface and provides with direct access to configuration settings and easy editing of metadata pre or post recording.

"The features, the new filing structure and the advanced metadata editing implemented in version v4.2 are major improvements and offer significant time savings - says François Musy who just finished the shooting of the latest Silvio Soldini feature film "Il Comandante e la Cigona" – the user interface of the touch screen remote control is very intuitive and allows quick navigation through the menus. After weeks of intensive use, the new firmware has proven to be very stable and I can only encourage all SONOSAX SX-ST users to up-grade their SX-ST recorder, it's really a "Must Have".

FIRMWARE 4.2

for MINIR82, SX-R4 and SX62R

The new firmware versions 4.2 are currently under development also for the MINIR82, the SONOSAX SX-R4 and SX62R recorders, they will be available on our site in the course of January, 2012.

Thus the MINIR82 will also benefit from latest developments, offering a new file structure and the widened editing of metadatas.

For the SONOSAX SX-R4 and SX62R this version 4.2 will bring essentially some correctives to eliminate the inevitable small bugs.

Do not hesitate to visit regularly our website to stay informed about our developments and to freely download these updates.
